

MINITACT®

PRESENTATION

A perfect complement to the guide dog or the electronic cane "TOM POUCE®" for indoors, "MINITACT®" is a light, discreet, hand held control device, the size of a TV remote control. This infra red device vibrates indicating the distance and location of impending obstacles thereby ensuring a safe passage. This is provided free of charge following training in a specialized centre.

USE

"MINITACT®" is the ideal electronic aid for getting around indoors: the workplace, shops, administration buildings, crowded corridors...

TECHNICAL USE

Range: Adjustable from 1 to 6 metres

Weight: 65 grams (batteries included)

Measurements: Length: 100 mm - width: 16 mm - height: 34 mm

Batteries: 2 AAA batteries

Autonomy: Approximately 30 hours

Average lifespan: 7 years

Maintenance: Your training centre will service, repair and replace your device at their expense

HOW TO
OBTAIN YOUR AID

The centre will provide compulsory training free of charge before receiving your "MINITACT®".

Find the nearest training centre (what we do, try out our equipment, assess our training), go to www.visioptronic.com - [✉ contact@visioptronic.com](mailto:contact@visioptronic.com)
